

## BCAP Global Tactical Fund (BCAP-GTAC)

### Fund Type / Group Fund

- Mixed Fund / Fund of Funds / Cross Investing Fund / Exposed to Local and Foreign Investment Risk
- Group Fund : Moderate Allocation

### Investment Policy and Strategy

- The Fund has a policy to diversify its investments, both onshore and offshore, in equities, debt securities, Hybrid Securities, deposits and/or the investment units of alternative funds, investment units of property funds and/or REITs and/or investment units of infrastructure funds as well as other securities or seeking returns by one or more methods as specified or approved by the Office of the SEC. The main strategy of the Fund is to diversify its investments and to adjust its investments according to each situation by increasing the ratio of assets that have higher potential to generate returns and reducing the ratio of assets that are expected to generate less return. The Fund may consider adjusting its investment anywhere from 0% to 100% of the Fund's NAV depending on the discretion of the Fund Managers. The fund's investment advisor will be ALLSPRING GLOBAL INVESTMENTS (UK) LIMITED and AMUNDI SINGAPORE LIMITED.
- The Fund may invest in derivatives for efficient portfolio management or for hedging purposes depending on the discretion of the Fund Managers.
- The Fund invest in the investment units of other funds under the management of the Management Company not more than 100% of the Fund's NAV.
- Investment strategy : Active Management

### Risk Level

#### Moderate to High Risk

Investing in equity, debt instruments and/or alternative assets, with an investment in equity less than 80% of NAV

1.1) The Management Company will waive the Front-end Fee and the Back-end Fee for provident funds and/or private funds and/or funds under the management of the Management Company.

1.2) For customers who do not fall in the category of No. 1.1, the Management Company will charge the Front-end Fee and the Back-end Fee at the rate of 100% of the actual Front-end Fee and the Back-end Fee.

## GLOSSARY

**Maximum Drawdown** the fund's largest percentage loss over the past 5 years (or since inception if the fund has been operating for less than 5 years) measured from peak NAV/unit to lowest NAV/unit during a decline. The Maximum Drawdown helps provide some indication of the risk of potential loss when investing in the fund.

**Recovering Period** the time it takes to regain losses; this data provides information about how long it took to climb back from the largest loss to a former peak.

**FX Hedging** the percentage of foreign investments that are hedged against foreign exchange risk.

**Portfolio Turnover Ratio** illustrates how active the portfolio is traded during a particular period. This is calculated by dividing the value of total purchases in 1 year or the value of total sales in 1 year, whichever is lower, by the fund's average NAV over the same period being measured. A fund with a high Portfolio Turnover ratio denotes that its portfolio managers actively trades the securities in the portfolio; this incurs considerable trading costs which should be taken into consideration in comparison with the performance of fund to ascertain whether the active trading activity is well justified.
